Caring For New Brows

- Avoid washing the area in the first 24 hours
- Avoid any exfoliants during the healing process (14 days)
- Avoid swimming pools, the beach, steam rooms and saunas during the healing process (14 days)
- Apply after-care products recommended by Beauty Brow & lash Bar and associated professionals

On The First Day ...

- Bath or shower as normal – NO SOAP or CLEANSERS on the treated area for one day, as they can be detrimental to the bonding process that must take place for the pigment to stabilize the skin.
- Apply the recommended medi cream and refresh every 2 hours, Refresh every 2 hours, by wiping the old cream with a damp cotton pad, wipe again with a new clean damp cotton pad to remove any excess clear fluid. Reapply a thin smear Aftercare Soothing cream with a clean cotton tip.
- Cold compresses or ice packs will help bring the swelling down (if evident). Don't use ice if brows are still numb.

Daily Care To Follow For 7 Days

- Apply Aftercare Soothing Cream (thin layer only) twice a day using a cotton bud. Wash your hands before applying the product to prevent cross-contamination, and by using a clean cotton bud for each eyebrow. The medi cream can be used up to 5 times a day for the first 7 days, then twice a day for 14 days for the best results.
- We recommend that you use Cleanse – a gentle facial cleanser to freshen your skin during the first week. Morning and night. Do not splash water while washing your face. Do however clean your brows twice daily with damp cotton pads.
- Keep your hair away from your eyebrows to prevent the possibility of infection.
- Some itching is normal. **DO NOT PICK, PEEL OR RUB** your eyebrows as the colour may heal unevenly and you could risk infection, which in turn could lead to scarring. Allow the colour to flake away by itself.
- Do not receive skincare beauty treatments for 7 days after the application of your eyebrow tattoo.
- No make-up or regular creams should be applied close to your eyebrows for 7 days.

Avoid for 2 Weeks

- Do not expose your eyebrows to direct sun, tanning treatments, spas, saunas, salt water, chlorinated pools and direct shower spray.
- Do not receive eyebrow tinting, waxing, electrolysis or laser hair removal treatments close to the brow region.

Long Term Care

- Use a good sun screen lotion/cream. Sun exposure will fade your permanent cosmetics.
- If you are planning a chemical peel, laser procedure or an MRI scan, please inform the technician of your permanent cosmetics.
- Please inform the National Blood service if you donate blood, as you may not be eligible to give blood for a year post application.

Important Notes

- Remember, colour will be stronger and more sharply defined for up to 14 days after application but as the healing process occurs the colour will soften and lighten.
- The approximate healing period is 14 days, however healing can be prolonged if your immune system is compromised, if you are generally stressed and by poor diet.
- Keep in mind that in many cases, some unevenness of colour is to be expected in some cases up to 60%. Therefore the re-touch visit allowing us to fine tune your enhancement is an important part of the whole process.
- The area where the tattoo has been applied must be kept moist for successful healing to avoid scabbing.
- Scabbing will result in excessive loss of pigment.
- Skin can take anywhere from 21 to 36 days to repair itself using the Cosmetic Tattoo Medi-Cream. It will nourish repair the skin, and protect it from infections.
- Exposure to sun, Salt Chlorine & Chemicals. Exposure to the sun over time can cause fading and colour change.
- Wear a sun block, or products containing UVA/UVB blocks, and wear sunglasses to protect your eyeliner.
- Salt or Chlorinated water can cause a bleaching effect – it is recommended the tattoo be covered with Vaseline.
- Chemicals of any kind could interfere with the healing and the colour.
- Glycolic Acid and face peel products must be kept completely away from the Tattoo as continued use could lighten colours.

Laser Resurfacing

- If you are having laser resurfacing or laser hair removal after your Cosmetic Tattoo, please inform that laser operator of your Cosmetic Tattoo procedure.

FAQS

What will I look like immediately after the treatment?

- You may experience slight swelling and/or redness for 1-2 days after exfoliation for 4-6 days following the procedure.

Can I donate blood after a cosmetic tattoo?

- You cannot give blood for a period of 12 months after any tattoo.

How often will I need to have my cosmetic tattoo re-done?

- A touch up of colour is recommended approximately every 12-24 months to keep the pigment looking its best.
