BROW FEATHERING→ PRE-PROCEDURE INSTRUCTIONS

- ✓ Avoid alcohol for 24 hours before a procedure; alcohol in your blood stream can increase bleeding during a procedure; and if you are unwell, the healing process will be slower, and the treatment may be less comfortable than when you are in good health.
- ✓ It is recommended that you make sure they have eaten something and have had enough to drink (non-alcohol!) so that they are not dehydrated.
- ✓ Delicate skin or sensitive areas may redden and swell slightly.
- ✓ It is advisable not to make social plans for the same day immediately after your treatment.
- ✓ No pain relief prior to the procedure such as Aspirin or Panadol.
- ✓ No vitamins or multi vitamins for 7 days prior to the treatment.
- ✓ If your client bruise or bleed readily, or regularly, or regularly use Fish Oil, Ginger, Garlic, Ginseng or Ginkgo, it is recommended that they start taking Arnica Tablets for 3-5 days prior to the treatment.
