Luxe Eyebrow Henna

It is a revolutionary product which is perfect for people who have no time to apply makeup daily. It colors the eyebrow hairs as well as the skin underneath the brows thereby eliminating the need for daily touchups.

Our brow henna contains natural henna which not only protects and nourishes but also colors your brows naturally. Unlike other brow henna brands, ours does not contain any fillers or chemicals that can affect the skin adversely.

Our well researched and formulated non-drip product is resorcinol and ammonia free and very safe. It is great for accentuating your natural features by tinting and shaping your eyebrows.

Features

- Natural tinting for eyebrows, available in various unique shades
- Gives a long lasting effect & 100% coverage
- Stays on the eyebrow hair for up to 6 weeks and on the skin for up to 7 days (maybe more depending upon the skin type of the end user)
- Contains herbs like Amla & Shikakai which give vitality & strength
- Is incredibly gentle on application & results in well conditioned brows

Eyebrow Henna is available in the following shades:

Truffle, Caramel, Cappuccino, Brownie (You can also mix these colors according to the requirements)

Instructions for using Brow Henna:

STEP 1: Clean the skin in and around the eyebrows with water/ primer.

STEP 2: Mix the required portion of Brow Henna with warm water to make a paste that is not too thick or too thin to apply. (The density of the paste affects color saturation on the brow hair and skin).

STEP 3: Apply the paste on the eyebrows and leave it until it is fully dry (approximately 20-30 minutes)

STEP 4: Rinse off the paste and henna with plain water.

Safety Instructions

Read the information given below carefully before you start

- Carry out a Hypersensitivity Test (given below) 24 hours before application
- Use the pair of gloves to avoid staining of hands and clothes
- Use plastic bowl and spoon to make the paste
- If the paste gets into your eyes wash immediately with cold water, if irritation persists consult a doctor.
- Do not keep any unused mixture for later use.
- Slight variations of the shade may occur depending upon color and nature of your brow hair.
- Keep the henna away from children.
- Store the henna in a cool and dry place.
- For professional use only

Hypersensitivity Test

We suggest you to take the hypersensitivity test 24 hours before application as some people may be allergic and these preparations may cause inflammation of the skin.

How to do a Hypersensitivity Test

- Clean and wash a small area of the skin behind the ear or upon the inner surface of the forearm using soap and water.
- Prepare a small quantity of paste, apply to the area and allow it to dry.
- After 24 hours wash the area with water. If no irritation, itching, reddening, swelling or inflammation is experienced in or around the test area, it may be assumed that no hypersensitivity to the brow henna exists.
